

Dear

80% of Americans do not support slaughter, and support the management of wild horses in the wild.

I DO NOT support the funding of horse slaughter inspections in the US.

I DO NOT want protections removed from wild horses transferred to other government agencies.

I DO NOT want healthy, adoptable wild horses to be destroyed by any means.

STOP roundups of wild horses and pursue strategies that will resolve the crisis created by decades of mismanagement of the Wild Horse and Burro program.

Wild horses should be managed on the range: Reduce/remove livestock on lands set aside for wild horses and protect/reintroduce predators. Return horses in holding to their rightful lands.

Respectfully,
